Education

GL Bajaj Institute Of Technology And Management

Aug 2023 – Present

Bachelor of Technology, Artificial Intelligence & Data Science

CGPA: 7.5+

Goodley Public School

2023

Senior Secondary, CBSE

83.3%

Goodley Public School

2021

Secondary, CBSE

85.7%

Technical Skills

Languages: C++, Python, Sql

Databases: MySQL

Developer Tools: Git, Github

Core Concepts: Data Structures & Algorithms, OOP, Machine Learning

Machine Learning: Pandas, NumPy, Matplotlib, Scikit-learn, Feature Engineering

Projects

BrainPal | *ElectronJS, Chrome Extension (MV3), FastAPI, WebSockets* | Desktop App

- Designed an interactive analytics dashboard **using** ElectronJS + Chart.js visualisations **to achieve** clear insights into binge patterns, time-spent trends, reel frequency, and scroll behaviour — powered by a lightweight local database and PPI-based pixel-to-meter conversion for precise activity metrics.
- Engineered a low-latency event pipeline using WebSocket batching and a Node.js/ FastAPI ingestion layer to achieve a ~40% reduction in sync lag while reconstructing session boundaries, binge streaks, and structured daily usage timelines from raw browser signals.
- Built a cross-platform digital-wellness tracker using a Manifest V3 Chrome Extension with DOM/state listeners and scroll-delta tracking to achieve real-time detection of Shorts sessions, reel changes, watch-time, and physical scroll distance with accurate behavioural telemetry.

ResumeIQ | NLP-Powered ATS Analyzer & JD Matcher | Python, TF-IDF, FastAPI, Scikit-learn | Web App — [ResumeIQ](#)

- Built an end-to-end ATS analysis engine **using** TF-IDF vectorisation and cosine similarity scoring **to achieve** high-accuracy (85%+) job-resume matching, automated keyword-gap detection, and structured relevance scoring across skills, experience, and domain context.
- Engineered a scalable NLP pipeline **using** Scikit-learn, regex-based text normalisation, and rule-based heuristics **to achieve** precise extraction of job requirements, resume entities, and missing-skill patterns that improve resume optimisation efficiency by 40%.
- Shipped a full FastAPI backend **using** modular scoring layers, async endpoints, and JSON-based insight delivery **to achieve** instant ATS reports, section-level recommendations, and ML-driven shortlisting probability estimation — all accessible through a clean REST API.

Certifications & Training

Complete Data Science, Machine Learning, DL, NLP Bootcamp | Harkirat Singh

- An end-to-end bootcamp by Harkirat Singh covering Data Science, Machine Learning, Deep Learning, and NLP fundamentals along with practical model-building workflows.

Data Analytics Job Simulation | Deloitte
